

## MAYBE BABY

Have you thought about....

- **Will the Babies be put in “day care”** during the school day? If the Babies are not “turned off” the students (and the whole school) will be fully involved in the project, BUT some staff and students may not be happy. All staff will need to support the program if the Babies are to remain with students for the school day.
- Putting the babies in & out of “day care” can be **time consuming**. Will your students be released early from class to collect their Babies (unless you have pre programmed the Babies via the computer program)?
- **Boys** need to be involved in the project as well as the girls. How are you going to achieve this?
- Some students may need your support **out of school hours**.
- How will you manage **feedback** at the end of the program? The students need an opportunity to reflect on their experience caring for their baby.
